## **About This Report**

This report was produced by the Enterprise Project Management Office (EPMO), which is part of the Agency of Digital Services (ADS). The purpose of the report is to meet statutory requirements for reporting on technology projects with an IT activity cost of \$500,000 or more and to provide a summary of independent reviews that were conducted during the calendar year.

This report only includes information technology (IT) activities for the Executive Branch of State government and was compiled in collaboration with the State entities who have a qualifying project. Future costs and dates projected in this report are estimates based on current information and are subject to change. This report includes all IT Activities that have implementation costs occurring on or after July 1, 2018, and have a total implementation and operating cost of at least \$500,000.

The EPMO has identified the following IT activities that meet the statutory dollar threshold for reporting. These IT activities are organized within this report by State Agency/Entity.

Statutory requirements met in this report:

## 3 V.S.A. chapter 56 § 3303 (a)(4)

(a)(4) an outline summary of information, including scope, schedule, budget, and status for information technology projects with total costs of \$500,000.00 or greater.

## 3 V.S.A. chapter 56 § 3303 (d)(1)

(d)(1) The Agency shall obtain independent expert review of any new information technology projects with a total cost of \$1,000,000.00 or greater or when required by the Chief Information Officer.

## Independent Reviews completed from January 01, 2022, through November 30, 2022

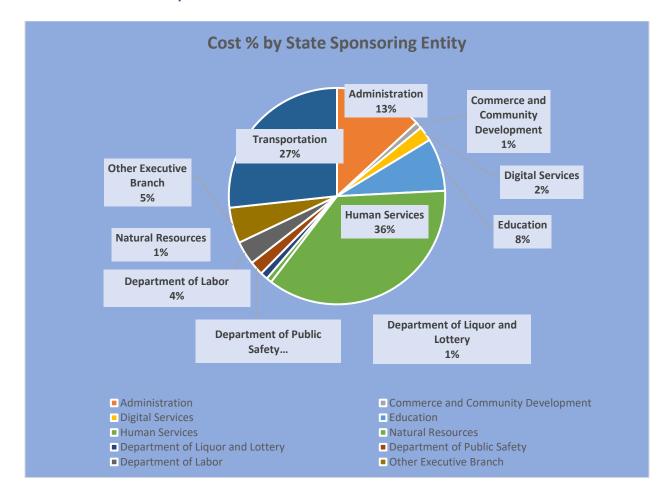

|                           | IT Activity Name           |  |           |  |  |  |  |

## **Summary & Metrics**

## Portfolio Summary & Metrics

## **Total Estimated Implementation Costs**

\$206,603,845.09

Implementation costs are the one-time project costs to implement the solution. Includes both federal and state dollars.

**Top 10 Projects for Highest Estimated Total Implementation Costs** 

| Rank | Entity              | Project   | Total Implementation<br>Costs |
|------|---------------------|---|-------------------------------|
| 1    | Transportation      | AOT DMV Core Systems Replacement                                  | \$50,785,690.00               |
| 2    | Human Services      | AHS DVHA MMIS Medicaid Data Warehouse & Analytic Solution (MDWAS) | \$33,917,808.00               |
| 3    | Transportation      | AOT Vermont Asset Management Information System (VAMIS) Project   | \$12,774,957.49               |
| 4    | Administration      | AOA Enterprise Resource Planning (ERP) Project                    | \$11,000,675.35               |
| 5    | Transportation      | AOT Construction Management System (CMS)                          | \$9,550,230.08                |
| 6    | Administration      | AOA BGS Enterprise Electronic Procurement Solution - VTBuys       | \$8,852,186.00                |
| 7    | Human Services      | AHS DVHA IEE VHC Modern Data Analytics Reporting (MDAR)           | \$3,722,727.80                |
| 8    | Human Services      | AHS DCF CDD Integrated Information System                         | \$3,605,387.98                |
| 9    | Department of Labor | VDOL Unemployment Insurance Modernization                         | \$3,500,000.00                |
| 10   | Human Services      | AHS DVHA MMIS EVV (Electronic Visit Verification)                 | \$3,475,251.70                |

## **Total Estimated Operational Costs**

\$251,284,200.60

Total costs to operate & maintain the solution through its life. Includes both federal and state dollars.

## **Top 10 Projects for Highest Estimated Operational Costs**

| Ran<br>k | Entity           | Entity Project  |                 | #<br>Years |
|----------|------------------|---|-----------------|------------|
| 1        | Human Services   | AHS DVHA MMIS Medicaid Data Warehouse & Analytic Solution (MDWAS) | \$64,762,927.90 | 5          |
| 2        | Transportation   | AOT DMV Core Systems Replacement                                  | \$41,567,188.00 | 5          |

| Schedule                          |   | upgraded timeline updated expectati                         | The State Team has met to discuss the proposal. A new plan that includes an upgraded timeline to R.174 has been approved. The vendor has sent over an updated expectation of the schedule and will be working on the detailed milestone dates so we can align an overall project schedule.     |        |            |  |  |
| Budget                            |   | schedule alignmer<br>ensure all updates                     | The budget continues to be on track and monitored for adjustments needed. Upon schedule alignment an updated IT ABC will be created. Working with the business to ensure all updates are present and any changes are made to bring the budget up to an accurate representation of the present. |        |            |  |  |

Implementation of an electronic procurement solution which enables end-to-end source-to-pay procurement while increasing transparency and purchasing consistencies. Implementation will result in an innovative and fully integrated solution empowering the State to improve customer service within the State, with the vendor community, and public access of information while reducing the cost of procurement through gaining grater economies of scale. The solution will integrate with the State's financial system, VISION and be able to report out spend data across the State.

## **Schedule Summary**

The project implementation is expected to take approximately 18 months. Due to a pause that was required to respond to COVID related demands, the implementation is expected to now be completed by mid-year 2023.

| Project                           | Status            |  | ι        | <b>Jpdate</b> |  |                |  |
| Scope                             |                   | Several Change Requests were recently processed to defer some scope and increase the amount of drawing conversions that were slightly underestimated. The current scope of work includes obtaining quotes for developing 6-7 interfaces. The VT Team and Contractor need to plan for this work to be completed.  |          |               |  | d. The current |  |
| Schedule                          |                   | After recently moving several module implementation dates in the schedule to reflect a new completion date of 12/23, it's now also noted that the first planned integration is taking longer than initially planned and high-level placeholder timeframes need to be added for 6 more integrations, and therefore the schedule   |          |               |  |                |  |
| Budget                            |                   | needs to be updated again.  There are no issues with the current budget available, however the likely extension of the project duration to accommodate all remaining module implementations and 7 system interfaces will likely require a recalculation of the long-term costs for assigned ADS resources. While anticipated funds appear to be available, a revised spending plan is under development. |          |               |  |                |  |

In scope items for this project are several modules from the AiM system by AssetWorks and integrations with several other systems including VISION, Bank of America Works, VAMIS, and VT-Buys. This will aid Building and General Services in space management, Capital projects, and all Buildings and General Services operations. In addition, the AiM system will change the operations of the business and create better transparency.

## **Schedule Summary**

This implementation started on 3/30/2021 and is currently estimated to be completed in Dec of 2024. However this estimate may likely change as the half dozen planned integrations will not be quoted and planned in detail until later in the project as they come up in the schedule.

The Vermont Online Library is a collection of databases provided statewide to Vermonters of all ages via their local public, school, or academic library. To ensure that we are meeting the information needs of Vermonters at a competitive price we propose issuing an RFP for bids that will include databases that meet the needs of all Vermonters.

## **Schedule Summary**

A new contract and/or database is being worked on to extend the existing agreement. This is anticipated to be completed in the 1st quarter of 2023.

| Schedule                          |  | The implementation RFP responses are due on 12/21/2022 with a project implementation date estimated to start on 7/1/2023. |           |  |       |                |  |  |
| Budget                            |  | The budget has been approved and there is a budget subcommittee responsible for monitoring expenditures for the effort.   |           |  |       |                |  |  |

The ERP Project is a multi-year project with multiple workstreams to upgrade the existing Human Capital Management system (VTHR), CGI Vantage Budget system, Finances VISION system as well as financial systems at the Agency of Transportation (STARS) and the Department of Labor (FARS) that currently run on 30+ year old mainframes.

## **Schedule Summary**

The ERP project is a multi year with multiple workstreams. Budget System replacement is estimated to be a 12 month implementation. HCM replacement is estimated to be a 18 month implementation. Financials is estimated to be 18-24 month implementation. There will be overlap of workstreams, the entire project is expected to be complete in FY26.

Tax will be replacing their current scanning systems software that supports paper returns, payments & remittances processes. The solution will update legacy technology that is over 20 years old. The focus of the initiative will build out four main components, including Document Capture, Check Processing, Conversion and Content Management.

## **Schedule Summary**

The expected duration of the project will be 2 years ending in Winter 24'. Procurement will likely be completed by the end of May 23'. The schedule for execution will need to be developed in conjunction with the selected vendor.

This project will transition the support of the States 6500 Enterprise Voice over Internet Protocol (VoIP) platform users currently managed by the Agency of Digital Services (ADS) Shared Services Division to Contractor NWN. Additionally, new features to support E911 location information will also be included as well as provisions for additional scope for a Contact Center.

## **Schedule Summary**

The work was initially thought to last 6 months beginning Oct 2021. However, there is a lot more work involved to transition the state prison sites and Public Safety, as well as updating each State facility to support the e911 enhancements. With limited resources, the duration of the project will take much longer than initially targeted and is currently estimated to last through Dec 2023.

The ADS Security Office will be implementing a Security Information and Event Management (SIEM) IS to assist in the monitoring of data systems across the SoV network. 35 data sources have been identified for onboarding with the opportunity to add additional sources during the managed services period.

## **Schedule Summary**

The project will run from July 22' through mid December 22'. Execution began in September 22' and is scheduled to be completed on December 12 promptly transitioning to managed services and security monitoring.

This project is for the establishment of a platform to administer alternate assessments to students with significant cognitive disabilities in the areas of Math, Science, and English Language Arts, as well as for alternate assessment development, as described in the Consolidated State Plan.

## **Schedule Summary**

Procurement of a vendor is currently in process. Once a contract has been executed, it is estimated that development and implementation of this system will take approximately 6 months to complete, with a system launch planned for spring 2023.

This project is to replace the Agency's Child Nutrition Management System. The new system has replaced the previous system and will offer expanded functionality once phase 2 is completed. The new system accepts and processes program applications and claims, manages data collections, and provides reporting for all School Nutrition Programs and Child and Adult Care Programs through the United States Department of Agriculture.

### **Schedule Summary**

The project schedule has been extended by formal change request once and a contract amendment is pending execution to extend the implementation period through 12/31/23 to complete phase 2. Vendor constraints, unforeseen data conversion issues, and COVID complications have contributed to the implementation delays.

The project will enable the State to collect education data from Vermont's Supervisory Unions and Districts (SU/SDs) via a modern, secure, and accurate data architecture using the Ed-Fi application programming interface (API) and operational data store (ODS). The project includes a pilot for school year 22-23, implemented by Agency of Digital Services staff, and a production environment implemented by a vendor for the 23-24 school year forward.

## **Schedule Summary**

The pilot environment for the 22-23 school year to test the standard Ed-Fi implementation of the API and the ODS has been setup and is ready for the SU/SDs participating in the pilot. A vendor is being sought, via RFP, to help setup the system and processes that will be used as the production environment, incorporating the lessons from the pilot year, for use in school year 23-24 forward.

| Schedule                          |  | The release of the RFPs was delayed one month due to modifications allowing COTS solutions in addition to a Salesforce/OnBase combination. The impact of this change may be more than an additional month since the implementation timeline is unknown, keeping the schedule in yellow. 11/21: Last Vendor demonstration completed 11/22: Final evaluations began |            |   |       |            |  |  |  |
| Budget                            | AOE has completed the AOA Revised Response to AOE IT Projects SFR Questionnaire dated 03/17/22. Pursuant to that, this project has been approved to use the ARPA-SFR dollars allocated to it in last year's budget. M&O costs associated with the extension of the project are \$200,000, for use of the current licensing solution, ALiS, through 12/31/23. |   |            |   |       |            |  |  |  |
| Scope Summary                     |  |   |            |   |       |            |  |  |  |

A new system for educator licensing, including fee collection and enforcement case management. The system will be used to issue both new licenses and license renewals, track educator continuing education requirements needed to maintain a license, and manage licensing enforcement cases. The new system will either leverage the existing Salesforce enterprise environment, using OnBase as the document management solution, our preferred approach, or will be based on a Commercial Off The Shelf (COTS) solution. Direction will be determined during the evaluation of the RFPs.

## **Schedule Summary**

The RFP allowing Commercial Off The Shelf (COTS) software responses was released in September 2023. Independent Review and procurement activities will be completed in 2023. Implementation dates will be determined once the vendor has been selected. The expected project completion is December 2023.

| Budget                            |                                  | This project is well within its budget with over 90% of original reserves remaining.  The implementation project will remain open until the remaining ADS Labor invoices for Sept and first half of Oct 2022 are received and loaded into EPMO PPM to finalize budget information. Once done, the project will be closed. |   |  |                 |                                 |  |  |

The scope includes online grant applications in a dozen program areas throughout AOE, to include workflow review and approvals between the AOE and VT School Districts. Grant monitoring will also be developed for each one and a data warehouse is being established for a number of reporting opportunities. Annually, there are adjustments made to the grant pages (i.e. advancing the fiscal year referenced in the grant), and an occasional enhancements made as needed. Other one-off requirements are also being developed as part of a minor list of deliverables that remain.

### **Schedule Summary**

The new system was being implemented within a year of its start date for each of the Agency of Education (AOE) Program areas, with a number of residual requirements being completed thereafter. Now in it's 5th and final contract year, those residual "punch list" items are still being developed. A very good working relationship between the AOE and Contractor has allowed for these additional items to take longer than necessary to get completed, while both parties have been resource challenged since the initial grant implementation work was completed.

| Budget                            |  | Project was completed under budget.                         |   |                          |          |               |  |  |  |

This project expanded upon the existing COVID Help Desk application with the development of a community portal to provide a public facing, searchable Knowledge Base solution and expanded the Help Center functionality to all AOE divisions. The Knowledge Articles in the solution are organized by Hubs and Topics, as well as resource type, to help users find the appropriate content quickly and easily. The scope for this project has been completed.

## **Schedule Summary**

The solution had a technical go live on 02/15/22 and a public go live on 09/09/22. Between technical and public go lives, AOE staff was trained on the system and the resource center was populated with content. Project is completed.

| Schedule                          |   | A schedule will be created, and a baseline established once a vendor contract has been executed. The project end date is currently 7/31/2023, a contract has not been fully executed.                          |  |  |                |  |  |  |  |  |
| Budget                            |   | The actual forecasted cost based on the apparent successful vendor response represents a very large increase in vendor costs from the approved IT ABC. The IT ABC is being revised to reflect the cost change. |  |  |                |  |  |  |  |  |

The Vermont Agency of Education seeks an online professional learning product that covers brain development and the neurological processes underlying language acquisition and the development of Phonics, Phonemic Awareness, Vocabulary, Fluency, and Reading Comprehension. The training products are intended to be used by all Vermont educators.

## **Schedule Summary**

Vendor has been selected, contract negotiations have been successful, and contracts have been drafted. Implementation is scheduled to be complete by August 2023.

| Schedule                          |  | No comprehensive schedule ever developed or managed to reflect the work. With future implementation Rounds paused and yet to be scheduled there is no estimation when a timeline and/or project completion date will be established. |   |   |   |       |  |  |  |
| Budget                            | There are no issues or concerns in completing the current scope of work with the currently available budget. There is a \$119K contingency reserve still available for AOE's discretionary spending, but beyond that, product enhancements and any related potential development costs are currently outside the scope of this projects implementation budget. |  |   |   |   |       |  |  |  |

The scope of this project is to migrate all VT school districts from their current Finance and HR systems into a centralized solution. Additionally, a new coding format known as the Uniform Chart of Accounts (UCOA) will standardize the codes used by all the districts. Due to shortcomings with the product and Vendor meeting SU/SD business needs, and challenging system upgrades that negatively impact the solution and its usability, the project has paused. During this pause, a group of Key Stakeholders will develop a recommended path forward and present it to the General Assembly in Dec 2022. The results of that plan, proposed changes to the current scope and contract, and it's approval, may very well change the scope of this project.

### **Schedule Summary**

The basic migration and implementation of all school districts into the new Shared School District Data Management System (SSDDMS) is to be completed by Dec 31, 2022, however statute changes under review by the General Assembly would extend that into 2023 while a Study Group develops a path forward recommendation. There are currently 20 of 53 SUs/SDs implemented with another underway this summer/fall timeframe.

This project is for the establishment of a platform to administer peer-reviewed assessments to all students in the areas of Math, Science, and English Language Arts, as well as for peer-reviewed assessment development, as described in the Consolidated State Plan.

## **Schedule Summary**

A vendor has been selected and the contract has been routed for execution. It is estimated that development and implementation of this system will take approximately 6 months once the contract has been executed. The system launch is planned for early 2023.

The AOE Vermont Adult Education and Literacy (AEL) Project is a procurement of a new system that allows AOE to track and monitor the progress of adult students toward the achievement of their High School Diploma or equivalent. System features include intake, assessment, case management and reporting.

## **Schedule Summary**

Implementation has started and is scheduled to run through April of 23' with a completion date and transition to managed services for April 14, 2023.

Scope will be to document business requirements, go through the RFP process, procure a viable solution, then develop (to extent needed or configuration), implement, testing, acceptance of the new solution.

### **Schedule Summary**

DLP is looking to have a new solution in place no later than the close of the next State Fiscal Year (6/30/2022). Project delays have been experienced due to staff being allocated to COVID responsibilities.

Project will be to implement a modern interconnective system that will meet Adult Services Division's business needs.

### **Schedule Summary**

It is anticipated that this project will take 12-18 months to implement based on other projects of this Scope. The Schedule for this project was impacted by resources being shifted to handle COVID-19 related responsibilities. Resources are now available and the Business is looking to having a new solution implemented.

Child Development Division (CDD is currently executing its core business operations for Child Care through an outdated legacy application called Bright Futures Information System (BFIS). The BFIS system is currently running on an outdated platform that is no longer vendor supported and has proven to be inadequate. BFIS is in direct violation for the State of Vermont Cyber Security Directive 1.02. These 32 violations cannot be addressed due to software limitations. The BFIS application is prone to errors and has limited capability to take on new functionality. As a result, it is not possible to apply federally mandated changes to Child Care Financial Assistance Program calculations. This project replaces the CCFAP portion of BFIS.

#### **Schedule Summary**

Schedule Details continue to be flushed out after Vendor discovery sessions. Project implementation will continue into 2023

To facilitate the sharing of health records, this project shall result in a Contractor working to increase the data sources contributing to the data in the Vermont Health Information Exchange (VHIE) and increase meaningful access to health data on the system through means such as a provider portal, direct feeds to Electronic Health Records (HER) and care coordination systems, and providing access to patient data through third-party applications as directed by federal interoperability rules.

#### **Schedule Summary**

The contract between the State of Vermont Health Information Exchange (VHIE) and it's technology partner, the VT Information Technology Leaders (VITL) is an annual contract with scope established on a 12-month delivery cycle.

The State continues to design Medicaid population health programs with the notion that a complete understanding of a person's health experience and the factors influencing their health is essential to impacting quality of care, coordination of care, cost of care, and provider burden. The Health Information Exchcange (HIE) is essential to ensuring that the State has the needed data to impact health policy priorities, and this funding will be used to develop and use the HIE system for this purpose. This includes, but is not limited to, consolidating data systems to streamline the HIE function of collecting health data to include clinical, claims, social determinants of health and other clinically sensitive data, and developing reporting infrastructure to use longitudinal health record data to inform Medicaid operations.

#### **Schedule Summary**

The contract between the State of Vermont Health Information Exchange (VHIE) and it's technology partner, the VT Information Technology Leaders (VITL) is an annual contract with scope established on a 12-month delivery cycle.

Medicaid premiums and cost sharing incurred by all individuals in the Medicaid household may not exceed an aggregate limit of 5 percent of the family's income applied on a quarterly or monthly basis. This project will create a process to track each family's incurred premiums and cost sharing through an effective mechanism that does not rely on beneficiary documentation.

## **Schedule Summary**

The solution is anticipating to go-live by January 31, 2023.

| Budget                                  | Project is IAPD funded with a 90/10 Federal match rate. Current implementation spend is \$4,308,035.87. Total estimated spend is \$3,475,251.70 representing an spend of an additional 24%. The team is working through updating the IT ABC and forecasting future spend. |  |                                       |   |                |  |  |  |  |  |  |  |

Implement an electronic visit verification system (EVV) that meets the Federal mandate and integrates with Vermont's Medicaid Management Information System (MMIS). Complete Contingency Acceptance Specification Orders (SO) and Compliance Reporting. Make available Phase 2 Home Health Services EVV record processing by 1/1/23 deadline.

### **Schedule Summary**

EVV Phase 1 (Medicaid Personal Care Service delivery verification only): EVV Pilot launched 11/4/20 and was fully available by 12/31/20. Final CMS Phase 1 Certification Confirmation received 1/26/22. EVV Phase 2 (Medicaid Home Health Service delivery verification): VT Phase 2 platform enabled 12/1/22. 10/31/22 Received 1- yr CMS Good Faith Extension (GFE) for Phase 2 HHA vendor platform delays and Compliance Reporting controls development to be completed by 1/1/24.

The project scope will include procurement of and engagement with a solution provider for the Application Programming Interfaces (APIs) as well as internal development of the changes required for the the Medicare Modernization Act (MMA)/Buy In File process including design, development, testing and deployment service and deliverables.

#### **Schedule Summary**

Application Programming Interfaces (APIs) will begin to be implemented by April 2022 with additional functionality being added until full implementation by May 2023. Outstanding requirements yet to be defined by the Centers for Medicare and Medicaid Services (CMS) may require further work and will be evaluated as further information is provided from CMS.

Efforts to re-baseline the budget are underway. |                                       |                         |            |  |  |  |  |

This project is limited to the Long Term Care (LTC) data with the intent to utilize the Salesforce platform to create a single repository for LTC Medicaid client case tracking data.

#### **Schedule Summary**

The initial goal was to deliver this project by March 31, 2022. However, the vendor selection period has been extended. Therefore, a very notional project end date is estimated to be July 2023. A detailed project schedule is still required and will be updated once we have partnered with an implementation vendor.

| Schedule  |                   | Contracting is on track to be completed in Spring 2023. Once vendors are contractually engaged, a more defined project schedule will be created.     |                       |                         |                    |  |  |  |  |
| Budget  |                   | Given scope and schedule the project is expected to exceed the total estimated implementation spend. Efforts to re-baseline the budget are underway. |                       |                         |                    |  |  |  |  |

The Medicaid Data Warehouse and Analytic Solution (MDWAS) will leverage new and existing technologies to improve access, security, integrity, and utility of the State's Medicaid data for AHS departments involved with Medicaid service delivery. The MDWAS Project will provide a new data interface for stakeholders to access, analyze, and report using Medicaid claims, non-claim payments, and clinical data.

## **Schedule Summary**

The project is anticipated to occur over three years, starting in 2022 and going through 2025. Once vendors are contractually engaged a more defined project schedule will be created and shared with stakeholders.

In this project, Vermont's Medicaid Agency plans, designs, implements and evaluates advanced payment and care delivery models as alternatives to traditional fee-for-service payment, leveraging MMIS system enhancements and innovative program design. Vermont is a nationally-recognized leader in Medicaid payment reform efforts.

#### **Schedule Summary**

The Medicaid Payment Reform project is an ongoing initiative, in line with the Agency of Human Services' top priority of moving Medicaid services to a value-based framework. This project is current approved and funded by a CMS-approved Implementation Advanced Planning Document (IAPD) and a correlating IT ABC form that covers the time period of 10/1/21 to 9/30/23.

The scope of this project is for the implementation and use of the Payer Initiated Interface (PIE). The intent is to reduce claims paid for members/beneficiaries who have other health insurance coverage and become compliant with the requirement of the Deficit Reduction Act (DRA) of 2005.

## **Schedule Summary**

The project is on schedule to complete by February 28, 2023.

The purpose of this project is to submit monthly Transformed Medicaid Statistical Information System (T-MSIS) production files to the Centers for Medicare and Medicaid Services (CMS) and mitigate CMS identified data quality issues. T-MSIS effort collects utilization, claims, and other Medicaid data to improve beneficiary quality of care, assess beneficiary to care and enrollment, improve program integrity, and support our states, the private market, and stakeholders with key information.

#### **Schedule Summary**

Though TMSIS is an ongoing program, the team is working on updating an IT ABC form that will be post-dated for the term of 7/1/2022 through 12/31/2023. A change request had to first be written to add a workstream to add category codes to various systems via the Deemed Newborn/Former Foster Child workstream. A new change request will be in process in the weeks ahead related to adding closure reason codes to various systems that will make their way to TMSIS.

The scope of the project will Implement a new foundational Integrated Eligibility and Enrollment (IE&E) Notice Solution platform. In addition, an interface component will be created to consume legacy system notice meta data and then interface with the solution to generate the notices. Additional phases of the project will enhance features and capabilities of the new platform to meet federal partner and business enhancement needs.

## **Schedule Summary**

The project is expected to last approximately three years, ending in 9/2025.

| Schedule                          |                  | VDH IT will be requesting Documentation of the system by the vendor as added scope.  Independent Review - The draft report has been received. The EPMO has provided feedback to the vendor in preparation for the final draft report expected to be received on December 9. The findings of the report will be reviewed and the final decision to accept or reject could have a severe impact on the potential start of the project. StarLIMS - An Implementation Master schedule will be created in collaboration with the Vendor once the contract has been executed as the Vendor has indicated it may take them a few weeks to staff the project. |   |  |  |  |
| Budget                            |                  | An updated ABC IT f procurement schedu  | orm is needed to capturule and the resource tim | e the continual increased<br>e due to that increased t<br>Attachments A & B have | I time of the<br>ime. An updated total |  |

Upgrading the StarLIMS system is recommended to keep STARLIMS systems secure, modern, and high functioning. The upgrade is mostly focused on back end improvements and will keep the StarLIMS technical system up to date with modernization. The scope has increased as a gap analysis needs to be performed at the start of implementation to assure no changes have happended in the system that would have impact due to the Upgrade and would be added to scope.

#### **Schedule Summary**

The RFP process was protested by the StarLIMS product manufacturer. The procurement schedule was delayed approx 5-6 months waiting for conclusion of the protest. Once awarded, the State has been working with the StarLIMS Vendor to develop a contract but there have been multiple delays. Contract development and negotiations has taken approximately 8 months and is not complete. The projected start date of the project continues to be pushed out. The procurement schedule has no clear completion date. Additionally, there is a Independent Review in progress of which the quality is not adequate and the schedule for completion has pushed out by 6 weeks. A contract could not be signed until the Independent Review is signed by ADS Secretary. The implementation schedule is not clear but approximated.

The scope of this project is to complete implementation and technical transitions of the VT Health Information Exchange (VHIE) related to the Collaborative Service Project system-wide enhancements to develop the VHIE for use as a central component of Vermont's Unified Health Data Architecture. Following integration efforts that occurred in response to the COVID-19 pandemic, the next phase of integration between the Vermont Department of Health and the Vermont Health Information Exchange (VHIE) targets bi- directional exchange of immunization data between the State's Immunization Registry and the VHIE to ensure records on the VHIE are complete and enhance records made available to providers at the point of care.

#### **Schedule Summary**

The contract between the VT Health Information Exchange (VHIE) and their vendor, the VT Information Technology Leaders (VITL) is an annual contract with deliverables to be produced monthly and upon completion. The current contract covers the period of January 1, 2022 thorugh 12/31/2022.

Operations of the VT Health Information Exchange (VHIE System). Contractor shall maintain the technical infrastructure, software, hardware, and architecture of the VHIE to address Outcome 1: Improve Medicaid providers' ability to effectively treat and coordinate care for Medicaid beneficiaries by creating one health record for every Vermonter accessible to treating providers and care coordinators. Outcome 2: Enable longitudinal, population-based evaluation of Medicaid patients to optimize Medicaid services and care delivery. Outcome 3: Improve Medicaid providers' ability to effectively treat and coordinate care for Medicaid beneficiaries by alerting providers to admissions, discharges, and transfers of their patients. Outcome 4: Improve Medicaid providers' ability to effectively treat and coordinate care for Medicaid beneficiaries by delivering laboratory, radiological, and transcribed reports through the VHIE. Outcome 5: Enhance public health management of the Medicaid population (and general population) by automating capture and exchange of public health data through the VHIE system. Outcome 6: Support response to epidemic monitoring and emergency response by capturing and making available related data for the state's Public Health Authority.

#### **Schedule Summary**

The contract between the VT Health Information Exchange (VHIE) and their vendor, the VT Information Technology Leaders (VITL) is an annual contract with deliverables to be produced monthly and upon completion. The current contract covers the period of January 1, 2022 thorugh 12/31/2022.

| Budget                            |                                  | Funding was appropriated for Vehicle Services for the first release of the AOT DMV Core Systems Replacement effort. This funding should be sufficient to implement the Vehicle Services module of FAST DSVS software within the established project begin and end dates. |   |  |  |  |  |

The solution will manage: vehicle titling, registration, and renewals; impound records; dealer licensing & regulation; plate, decal, temporary and single-use permit inventory management. The solution will also: issue & maintain driver's licenses & other identification; support fraud detection, investigation, hearings, scheduling, and management, financial responsibility and the admin & reporting of driver restrictions, convictions, and other info related to driver improvement & control.

### **Schedule Summary**

The total implementation project duration will be 36 months. There will be two roll outs with 18 months for Vehicle Services (VS) and 18 months for Driver Services (DS).

The proposed solution includes procuring and implementing an electronic permit application, review, and approval system. Future phases may include municipal jurisdictions in the e-permitting process, which would lead to additional benefits to carriers and the traveling public.

## **Schedule Summary**

This project has been cancelled due to irreconcilable differences between the State of Vermont and the implementation vendor.

The project scope includes initial development of user stories by the State Agency of Digital Services, development of an RFP, and engagement in contract with a vendor that can deliver a solution using the agile development process. The solution shall integrate with the State's enterprise Salesforce platform and existing document management systems.

# **Schedule Summary**

The project started 7/1/2021. After delays resulting from a related project, the schedule was re-baselined from a targeted launch of January 2022 to April 2023.

Originally intended to be a multi-phase effort, the Unemployment Insurance Modernization initiative has been consolidated into one project. The project calls for the replacement of aging, stand alone systems that are mainframe based and both costly and increasingly difficult to support as Federally required UI changes have proven to be both lengthy and complex. A modernized system will improve customer service, reduce cost, meet all Federal and State compliance requirements, and reduce risk caused by outages of legacy infrastructure. The project scope consists of the complete replacement of the existing Unemployment Insurance system including the front end of the claimant portal, employer portal, employer registration, and fraud reporting/case management.

#### **Schedule Summary**

Request For Proposal vendor responses are being evaluated. An Independent Review will be undertaken and contract execution is targeted for April 2023. The project is anticipated to have an 18 - 24 month implementation schedule. Dates will be finalized upon selection of the IR vendor, and the vendor who we will contract with for the implementation. Currently, the project is estimated to be complete in December, 2023.

This is a full modernization project for the Workers' Compensation team, including case and document management via OnBase, integrating with First and Subsequent Reports of Injury submittal and processing through a third-party Software-as-a-Solution platform.

# **Schedule Summary**

The project is on track to be completed in fall 2023. Implementation kickoff occurred in late March 2022 with comprehensive discovery and development underway as of fall 2022.

The scope of this project is to implement a modern SaaS (Software as a Service) Customer Relationship Management (CRM) solution.

## **Schedule Summary**

It is expected that this solution will take approximately 15 months for implementation of this system once a vendor is secured through the states procurement process. The project is currently moving through contract negotiations. The system launch is anticipated for Summer of 2023.

| Scope                             |                    | The project scope is to replace the existing business portal which includes the forms, workflows, and existing data for SOS Corporations, VDOL Unemployment Insurance registration, and Business Tax ID registration. The project will also replace the SOS Corporations backend review system. The State Busienss Analyst (BA) will be working on a gap analysis to make sure the full scope is captured for the project and a future RFP. |                        |                           |             |        |  |  |  |
| Schedule                          |                    | The exact date for go live is unknown until the Project Manager (PM) is able to baseline the schedule. This will be determined by how much work is left to complete after the BA requirements analysis.   |                        |                           |             |        |  |  |  |
| Budget                            |                    | The full plan for th  | ne path forward on the | e project will include ar | updated bud | dget.  |  |  |  |

This project scope replaces the existing Vermont Business Portal and the Secretary of State's Corporations review system. The Vermont Business Portal houses the Secretary of State's Corporations business registrations, Vermont Tax ID Registration, and the Vermont Unemployment Insurance Employer Registration. These client facing forms and staff review processes will be updated to new technology that will be supported by the Agency of Digital Services.

#### **Schedule Summary**

The project was originally scheduled to be complete by the end of 2021 but delays in the procurement of document management services and issues with the existing Salesforce vendor has delayed the go live to an undetermined date. The project manager is working with State leadership to determine the path forward and develop a new schedule for completing the project.

This project will implement a new legal case management system for the Attorney General's Office. The solution will be used by all divisions and units, including staff associated with 14 client agencies/departments, Diversion and Pre-Trial Services providers, and Consumer Assistance Program staff at the University of Vermont. The project seeks to improve user experiences; increase productivity; improve information sharing, tracking, and reporting; and should help improve outcomes.

#### **Schedule Summary**

Project has been assigned a PM and official project kickoff occurred in October 2022. Based on timeframe in the IT ABC, the project is estimated to be completed by the end of September 2024.

The Cannabis Control Board (CCB) Application Implementation is building a system that allows for the application and issuance of various Cannabis Licenses. Other business requirements which will be automated, include functionality for an Appeals Processes; Licensing, Enforcement and Regulation and Seed to Sale (Inventory Tracking).

#### **Schedule Summary**

The overall project has been broken down into three discrete work streams. Phase 1 which has been completed and is now in managed services focused on licensing. Phase 1A will focus on the implementation of an Inventory Tracking system. Phase 2 will focus on the remaining backlog items, including the implementation of Licensing, Enforcement and Regulation and Seed to Sale (Inventory Tracking) which is scheduled to be completed by the end of December 23'.

By October 2022, the State will be rolling out an online Grants Application using Salesforce for DFR to manage all incoming applications. In the months to follow, phases 2 and 3 will be about establishing the necessary back-office process flows and automation along with building out necessary reporting structures.

#### **Schedule Summary**

By October 2022, the State will be rolling out an online Grants Application using Salesforce for DFR to manage all incoming applications. Throughout October the State will be building out the back-office logic and automation along with the integration to Vision in Phase 2. Lastly, all reporting and necessary logic for analyzing how the program is performing and the grants are being distributed will be part of phase 3 to be delivered by the 1st quarter of 2023.

The project's scope is to implement a Salesforce solution primarily based around licensing and enforcement needs for the Department of Liquor and Lottery (DLL). The project will include developing a new system and migrating data from the existing records management system Sequoia. The system will also allow licensees to apply and pay online as well as allow the town/city clerk to approve applications.

#### **Schedule Summary**

The project went live on 8/26/2022 and transitioned to Maintenance & Operations (M&O) on 11/1/2022. There is a contract amendment to move one milestone to M&O. The project will be fully closed by 01/01/2023.

| Schedule                          |  | The RFP will be re-posted in October. Contract execution is expected by 2/24/23 |            |                        |            |  |  |  |
| Budget                            | The budget is confirmed, this project will utilize ARPA Funds. ARPA Funds must be obligated by end of 2024 and expend by end of 2026. Total Project Implementation Estimate: \$500,000 |   |            |                        |            |  |  |  |

The scope initially is defined as digitizing all of District 4 & 7 NRB Land Use Permit (LUP) documents from 1970-2017 and store them for retrieval from the public Act 250 database website. The objective of the project is digitizing as many documents as possible where it makes the most sense from a business perspective.

# **Schedule Summary**

The RFP will be re-posted in January. Contract execution is expected by 4/30/2023. The project is estimated to be complete by December 31, 2024.

| Schedule                          |   | Project schedule has been updated to conclude end of June 23'. This will need to be confirmed once a vendor is selected. There is currently one open risk related to the project schedule. Delays in the completion of Vendor Selection have resulted in the adjustment to "Yellow". |  |                |            |  |  |  |
| Budget                            |   | The approved project implementation budget is \$400,944. There is one open risk pertaining to budget related to budgeted resource costs. These will need to be adjusted based on completed procurement process.  |  |                |            |  |  |  |

The Public Utility Commission (PUC) and Public Service Department (PSD) Case Management System Project will include the implementation of robust features that largely duplicate the automations built in the current application, they include: Docket and Matter Management, Records Management, Indexing and Searching, Reporting, Timekeeping, Electronic Filing and Calendaring, Scheduling and docketing. In addition, PSD will be implementing additional functionality that will expand on and build out a more robust Case Management system for the department.

#### **Schedule Summary**

Exploration, Initiation and Planning activities are scheduled to be completed by end of the calendar year, December 2022. The project will begin Design, Development and Implementation starting, 12/01/2022 and will run through the end of June 2023. However, based upon the procurement responses received, this schedule will likely be revised based upon the implementation master schedule. This project is behind the initial schedule due to the vendor adding in new indemnification language that we need leadership sign-off and agreement on to assume the risk within the State.

The intent of this project is to implement a new Case Management System for the State's Attorneys and Sheriffs Department.

# **Schedule Summary**

A complete project schedule with target implementation dates will be defined upon vendor selection. The SAS is in progress of drafting a Request for Proposal.

#### Agency of Digital Services

# Strategic Plan 2022-2026

#### IT MODERNIZATION

- Strengthen our digital foundation by replacing legacy IT systems with Integrated preferred enterprise platforms, thereby reducing
- Deploying new systems by utilizing cloud-based offerings to reduce our infrastructure footprint and total cost of ownership.

### BREAKTHROUGH **INDICATORS**

- 5 existing infrastructure-based systems migrated from OnPrem to Cloud Managed Services
- Replacement of 30 legacy applications with State-preferred enterprise platforms.

Mission: To collaborate with our partners in state government to deliver simple and intuitive technology solutions that improve the lives of Vermonters

#### VERMONTER EXPERIENCE

- Increase the number of simple, low-cost, online interactions that Vermonters have with their government.
- Build a closer online relationship with Vermonters, including single sign-on capability
- Improve Vermonters experience with state government by transitioning outdated paper processes with on-line, streamlined

# ▶ BREAKTHROUGH INDICATORS

- 48 public facing applications utilizing myvermont.gov single sign-on
- Provide 10 native mobile applications as alternative to existing public-facing services
- 50 public-facing processes automated with next generation

#### CYBERSECURITY & DATA PRIVACY

- Raise employee and Vermonter awareness of cyber risk and data privacy through training and reporting
- Grow the layers of cyber defense and analysis to proactively prevent threats and recover from attacks
- Coordinate cybersecurity policies and practices throughout State
- Improve data-driven decision making related to public health and safety through the development of robust data analytics, governance, and management systems

- 90% state employees that have completed the Cyber-awareness trainings quarterly Application and data risk evaluations integrated into the 12 cabinet-level IT estment plans by 2025
- 12 cabinet-level agencies and departments with technology risk evaluation report
- Full implementation of Security Information & Event Managements (SIEM) system by
- 5 data sets available for analysis in the new data environment by 2024
- All Dashboards and analytics available through PowerBI by 2024

#### FINANCIAL TRANSPARENCY

- Further reduce the number of applications through consolidation and elimination. This will result in lower IT maintenance costs, purchasing costs, licensing costs and employee costs over the life
- Develop a rolling 5-year IT roadmap and investment plan for all
- Develop dashboards and reports that provide timely and accurate budget and expenditure information to IT decision makers.
- Continue to grow our investment in cybersecurity

- 12 cabinet-level agencies to have a complete 5-year IT roadmaps and investment plans that is updated annually by 2024
- Reduce number of applications in use across the executive branch by 100 by 2026
- A minimum of 5% of IT budget dollars invested in security initiatives by
- Implement a technology business management solution and PowerBI for financial transparency by 2024
