

## Headset Guide

This list is intended to be use as a guide. The Department of Information & Innovation has tested the headsets listed below for compability with the Cisco 8811 phone. There may be other model headsets that are compatible; you may choose to utilize another headset.

Compatibility with other models should be validated by the Department wishing to purchase headsets. This can usually be done by accessing a compatibility guide on the product manufacturer's website. DII does not maintain inventory, install or support headsets regardless of how they are purchased.

If you have different (not a Cisco 8811) VoIP Phone, please check to confirm you order the appropriate cord, or quick connect adapter.

***All Headsets may be ordered through your Business Office via SOV Contracted Vendors.***

**Prices may vary**

**Available from SOV contracted vendors: Staples, Hello Direct, SHI, CDW, Versatile and others. (See [BGS](#)**
