

Updating your contact preferences for Multifactor Authentication

1. Click Settings, then Under “Your App Settings” click Office 365.

2. In the “My Account” screen, click “Security and Privacy.” Then click “Additional Security Verification,” and then Click “Update your phone numbers used for account security”

3. To update your contact information, you will be prompted for Multifactor Authentication. Follow the prompts to authenticate.

Microsoft Azure

For added security, we need to further verify your account

How do you want us to verify your account?

David.Fortin@vermont...

Text me at +X XXXXXXXX62

We've sent you a text message with a verification code.

Sign in

[Use a different verification option](#)

[Sign out and sign in with a different account](#)

[More information](#)

4. Once you have authenticated, you will be taken to the screen where you can update your contact preferences. You may add an additional authentication phone, and you may also configure the Azure Authenticator app (available free on the iPhone and Android app stores)

Additional security verification app passwords

When you sign in with your password, you are also required to respond from a registered device. This makes it harder for a hacker to sign in with just a stolen password. [View video](#)

what's your preferred option?

We'll use this verification option by default.

Text code to my authentication p

how would you like to respond?

Set up one or more of these options. [Learn more](#)
